TECHNICAL SPECIFICATIONS

GLASS CHARACTERISTICS

- TYPE OF GLASS
Clear float glass basis according UNE-EN 14449:2006 regulation and CE certification.
- SIZES
3210x2250mm.
- THICKNESSES
3+3, 4+4, 5+5 mm.
- COLOR
Basis oat glass is clear. On demand they can be produced on colored oat glasses or low iron.
- CLEANING
This glass offers exceptional easy to clean conditions due to its particular acid treatment.
- SEGURIDAD
Laminated glass is considered the safety glass par excellence because, even if the glass shatters, the pieces are stuck to a sheet of PVB, preventing small shards that can be very sharp and dangerous, as with normal glass.

PRODUCTION CONDITIONS

- PROCESSING
Float glass treated on its surface with an acid composition In order to obtain a ne translucent-satin nish with design. No alteration of its mechanical features.
- TREATMENTS
We manufacture our own laminated glass.
- EDGE TOLERANCE
15 mm maximum on the 3210 mm side and 5 mm on the 2250 mm side as a result of the manufacturing process.
- LIGHT AND ENERGETIC CHARACTERISTICS
Depending on the color, the design, the thickness of glass and the placing the treated side, position 1 or 2.

RECOMMENDATIONS
